A Novel Method for Handwritten Digit Recognition System

Observing the Metrics

```python
metrics = model.evaluate(X_test, Y_test, verbose=0)
print("Metrics (Test Loss & Test Accuracy): ")
print(metrics)
```

```
Metrics (Test Loss & Test Accuracy):
[0.10322817414999008, 0.9743000268936157]
```
